

## Training

### **Self-paced and Instructor Lead Training**

We offer training in ISO standards and associate skills via a range of platforms, including:-

#### **Self-Pace Online Learning**

We offer online, self-paced training at all levels.

Time pressed managers can take the opportunity to fit ISO specific training into their busy schedule. The materials cover the same ground as the live courses and are supported by ongoing email support and, where appropriate, online group sessions - on-site activity may also be arranged where appropriate.

Also available is a tailored staff awareness programme where we provide similar focused awareness, and competency. Streamlining the process and taking some of that workload of

your management layer.

## **Line Instructor Lead (Live) Training**

### **.private**

If you have more than 2 staff requiring ISO specific training (for example Internal Auditor) then we can arrange for a private course to be delivered at your location. The rates are generally the same as participating in our public courses.

### **.public**

With our public courses we bring together participants from a number of businesses. This may be beneficial as such an environment usually opens up discussions and scenarios beyond the daily experience of a single business - basically, it can introduce issues your staff may not have thought of, or introduced at a private course.

Course duration ranges from 1-5 days duration and may include a short exam, attendance and/or qualifying certificate, and post-course email support to help clear out any lingering points of clarity for a participating individual. More details via the main menu [or by clicking here](#).

## **ISO Standards**

**Asmund are please to provide access to a full range of standard (available as hard-copy or pdf) via the BSI Online Store. One of the biggest elements in success of a deployed management system is having access to a full copy of the standard - the same reference material an external assessor from a Certification Body will reference during an on-site assessment to to determine the conformity of your Quality, Information Security, or other management system to the requirements of the standard.**

**Therefore, we provide the following link to the *BSI Online Store* below.**
